

```
void f ( int * i )  
{  
    printf ( "%d\n" , * i );  
    (* i)++;  
    printf ( "%d\n" , * i );  
}
```

```
int main ()  
{  
    int i = 2;  
    f (& i );  
    printf ( "%d\n" , i );  
}
```
